**8** Inspired by the weathered surfaces and darker tones of wood and metal found in **Melin Tregwynt's** old mill, the subtle colour and weave effects of Semiplains create deceptively simple upholstery fabrics that complement its signature bold graphic designs. The collection has six colours.

**9 Arketipo** will introduce **Jupiter** at IMM Cologne. An elegant and ergonomic balance is combined with a dynamic and stable lightness. The chair has a folded metal arch structure that holds and supports the

glassfibre shell. Counterpointed and shaped feather blocks guarantee a high level of comfort.

**10** The Tension Lamp by Nick Ross from Konstfack Design School in Stockholm has won the **Muuto Talent Award 2014**. The Muuto design team selected the lamp as it felt that aesthetics, function and storytelling all meet in this great design while the references to the fishing rod are both fun and very Scandinavian.
