# Italian Meta Luxury brand Visionnaire

## Introduces the Bomber Living Room

If you are looking at re-decorating your Living room with a unique concept then here is one luxurious setting that could transform the way you lounge and work. The Italian Meta luxury furniture brand Visionnaire introduces the Bomber Living Room, a part of its Volare Collection. Chic, modern and trendy, this living room tells a story of elegance and sophistication. From the coziness of the Bomber Sofa and armchair to the sleek lines of the Karnak console and Ambassador writing desk, every element is thoughtfully curated to create a harmonious space. The Living Room Collection also includes a sensational coffee table, an elegant bookshelf and gorgeous lighting that completes the luxurious setting.

With its unique concept for the Bomber Living Room Visionnaire offers sophisticated furniture for the living area combined with exquisite pieces for the workspace section that allows you to switch between leisure and work effortlessly. The Bomber Sofa and the Bomber armchair, designed by Alessandro La Spada - are the result of sophisticated contemporary research on curved forms. An enveloping seating program, with soft, tubular volumes, that encourages relaxation with reminders of the world of fashion and soft down jackets. The back, composed of various tapered and overlaid parts, resembles the quilted structure of a down jacket, to wrap and welcome the user

A spectacular addition to the Bomber living room is the **Orbital** Low Table designed by **Mauro Liparrini**. The geometric purity of Orbit enhances the effect of the superb manufacturing quality of its materials, giving the table a refined elegance and a surprising functionality of support and service. Almost a sculpture, the Karnak console is a remarkable expression of the finest craftsmanship. The concave steel legs are completed by a sculptural marble top in Quartzite Michelangelo.

The Bomber living room also includes the Ambassador desk designed by La Conca, with aerodynamic lines, underscoring the exclusive character of the product. The shell in curved wood offers a set of drawers and wiring channels, entirely covered in saddle-stitched leather.
